Mission

Lion Coin (LI) is a Solana-based SPL token with a core mission: bridge the gap between cryptocurrency and real-world commerce on a global scale. Unlike speculative tokens backed only by hype, every LI token is underpinned by actual revenue from ten operating businesses spanning agriculture, healthcare, retail, green energy, and charity.

Our vision is a world where token holders don't just hold digital assets — they hold stakes in a thriving ecosystem of physical products, services, and experiences. When you buy LI, you're not betting on a promise. You're participating in a network of real businesses that accept, use, and grow with Lion Coin.

"Bridging crypto with real businesses worldwide."

Tokenomics

Lion Coin has a fixed hard-capped supply of 400,000,000,000 LI (400 billion). The mint authority will be revoked at launch, making this supply permanently immutable. Team tokens are locked for two full years to align long-term incentives.
